

How to register?

1. Click on '**Settings**', then '**License Manager...**'.

2. Click on '**Copy**' next to your Workstation ID. Then Click on '**Register Now**'.

3. Clicking on '**Register Now**' will send you to our website. **Fill out the form**. Paste the copied Workstation ID from above into the field titled '**Workstation ID**'.
4. You should immediately receive an **email** containing your '**Registration Key**'.
5. Copy this key into the '**Registration Key**' field, and click on '**Apply Key**'. Your plug-in should now be officially registered and permanently activated.

Licensing

DPR Model Slicer is available **free of charge** for anyone to use.

The current release, '**DPR Model Slicer v5**', will upgrade DPR Model Slicer v4. If you already registered v4 then the registration will be automatically transferred to your newer version of the software.

After installing, DPR Model Slicer will work fully for 30 days regardless of registration status. However, to continue usage after the 30 day period, we do request that you register your installation with us (for free). The information gathered through this registration will only be used to track plug-in usage, which will help guide future plug-in development.

The registered version of DPR Model Slicer will not expire.

Uninstalling

In order to uninstall the DPR Model Slicer v5, simply go to your Control Panel and click on '**Programs and Features**'. Then simply scroll down to find '**DPR-ModelSlicer_v5**' and click '**Uninstall/Change**'. Then follow the instructions on the uninstall wizard.
